INTRODUCTION

As part of the State of the Basin program, the Columbia Basin Rural Development Institute (RDI) at Selkirk College has developed Community Profiles for municipalities and electoral areas within the Columbia Basin-Boundary region. The Columbia Basin-Boundary region is located in the southeast corner of British Columbia (BC) and includes the entire Regional Districts of East Kootenay (RDEK), Central Kootenay (RDCK), Kootenay Boundary (RDKB), as well as Golden, Revelstoke, Valemount, Columbia Shuswap Regional District (CSRD) Areas A and B, and a portion of Regional District of Fraser-Fort George (RDFFG) Area H (see map, below).¹ This report covers Columbia-Shuswap Electoral Area A (CSRD-A).

The primary goal of the State of the Basin reporting is to provide easily accessible and relevant data to help inform decisions that lead to greater community and regional well-being. State of the Basin research draws on available data from a variety of sources including federal, provincial, and local governments, crown corporations, and non-profit initiatives. Both open access sources and custom data requests are used.

Community profiles are intended to share area-specific data with local governments and other organizations to help build a better understanding of local conditions and trends and assist in making evidence-based planning and management decisions. These reports may also be useful for supporting communications with current residents, prospective residents, and for business and workforce attraction.

Indicators in this report are quantitative, and while quantitative indicators help establish foundational knowledge of well-being, they only tell part of the story. Qualitative information, including the RDI's subjective well-being research, can further contribute to the understanding of our communities and region. In order to describe geographic trends in indicators, this report compares community data with regional, provincial, and national data where appropriate. The geographic divisions used vary by indicator and depend on the topic being measured and the available data. **For additional community and regional comparisons for indicators in this report, please see the [State of the Basin reporting](#).**

For other research reports on communities in the Columbia Basin, please see [RDI's Communities of the Columbia Basin](#). Statistics Canada also offers a suite of data sets through their [Census Program](#), where it is possible to search by place name and topic, and [Census Mapper](#) provides this data in mapped format. Interior Health has also developed [Community Health Profiles](#) for municipalities across BC, and the [Weather Network](#) offers a variety of weather and climate statistics. The [Columbia Basin Climate Source](#) website has area-specific climate data, including projections. [BC Stats](#) and [Local Government Statistics](#) are other online sources of community- and area-specific statistics.

If you have questions or feedback on this Community Profile, please [contact the RDI](#).

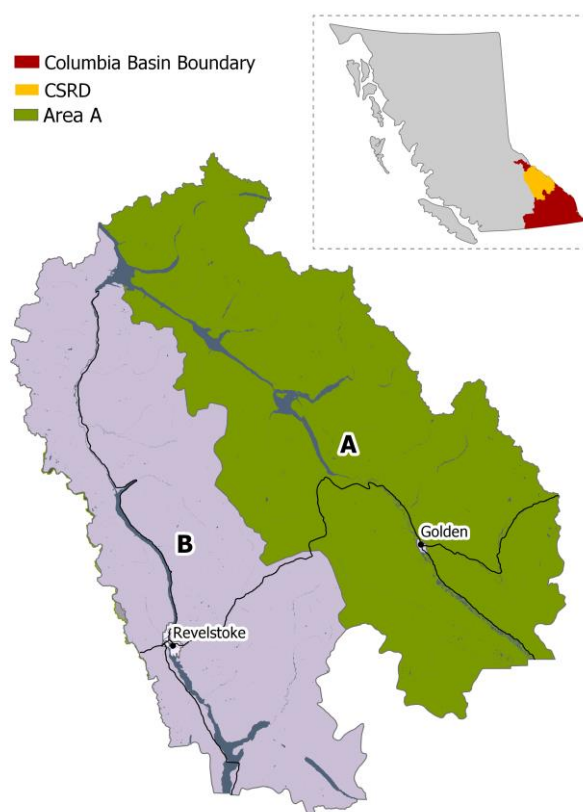

LOCATION & COMMUNITIES

CSRD-A covers 13,458.35 km² of Columbia-Shuswap Regional District. Located along the Glacier Mountains and with the Columbia River running through it, the area offers recreational activities of all kinds. These include fishing, skiing, hiking and biking among many others. CSRD-A stretches to the Alberta Border and spans the Rogers Pass. ²

| CSRD-A | |
|--------------------------------|---|
| Regional District | Columbia-Shuswap |
| Area (km²) | 13,458.35 |
| Communities² | Parson, Nicholson, Donald, Blaeberry, and the Town of Field |

Golden is not part of CSRD-A as it is its own municipality. However, it is a member of the CSRD and surrounded by area A. Therefore, indicators for Golden are occasionally used in this report where data are not available for CSRD-A.

DEMOGRAPHICS

Population characteristics³⁻⁵ help planners and local decision makers to evaluate current and future community needs, particularly with respect to service delivery and potential impacts to the local economy.^{i, ii}

Total Population

| | 2006 | 2011 | 2016 | Percent change 2006 to 2016 |
|---|-----------|-----------|-----------|--------------------------------|
| CSRD-A | 3,097 | 3,065 | 3,148 | 1.6% |
| Columbia-Shuswap Regional District | 50,141 | 50,512 | 51,366 | 2.4% |
| British Columbia | 4,113,490 | 4,400,057 | 4,648,055 | 13.0% |

Population Density

| | CSRD-A | Columbia-Shuswap | British Columbia |
|----------------------------------|--------|------------------|------------------|
| People per km² | 0.2 | 1.8 | 5 |

ⁱ Please see **Appendix A-1** for an important note regarding the use of random rounding in population and other demographic data sourced from Statistics Canada.

ⁱⁱ The RDI recognizes that gender identity is not a binary of male and female and that some transgender, non-binary, two spirit, and intersex populations may not be correctly represented by the data in this report. Databases that this report draws from, such as the 2016 census, limit responses to male or female. Canada's 2021 census will include more nuanced questions on sex, sexual orientation, and gender identity to better represent LGBTQ2IA+ populations.

Population Pyramid

Population pyramids³ illustrate the age and sex structure of a population. As of 2016, 16% of the population in CSRD-A was 65 or above, and 19% of the population was 19 or younger.

Labour Force Population Period

The chart below shows the distribution of children, emerging and primary workforce age ranges, and seniors within the CSRD-A population.

Population Projections

Population projections are available for each Local Health Area within the Columbia Basin.⁴ CSRD-A is covered by the Golden Local Health Area.ⁱⁱⁱ

| | Golden Local Health Area | British Columbia |
|--|--------------------------|------------------|
| Percent change in population projected 2019 to 2041 | 5% | 26% |

ⁱⁱⁱ A very small portion of CSRD-A is also covered by the Revelstoke Health Area. This is not a large enough area to be significant.

Average Age

| | CSRD-A ³ (2016) | | | British Columbia ³ (2016) | | |
|--|----------------------------|-------|--------|--------------------------------------|-----------|-----------|
| | Total | Male | Female | Total | Male | Female |
| Total population | 3,150 | 1,630 | 1,520 | 4,648,055 | 2,278,245 | 2,369,815 |
| Average age of population (yrs) | 43.2 | 44.3 | 42 | 42.3 | 41.5 | 43.1 |

FAMILIES & HOUSEHOLDS

Family characteristics³ such as size and composition of families can help inform social, economic, health, and education programming, as well as planning and development around infrastructure needs.

Family Characteristics

| | CSRD-A (2016) | Columbia- Shuswap (2016) | British Columbia (2016) |
|--|------------------|-----------------------------|----------------------------|
| Average household size | 2.2 | 2.2 | 2.4 |
| Total number of families in private households | 955 | 15,650 | 1,311,340 |
| Total couple families | 860 | 13,870 | 1,113,400 |
| Couples without children | 535 | 9,110 | 577,790 |
| Couples with children | 325 | 4,755 | 535,610 |
| One child | 150 | 2,010 | 221,065 |
| Two children | 135 | 1,960 | 230,705 |
| Three or more children | 35 | 780 | 83,840 |
| Total lone-parent families | 95 | 1,785 | 197,940 |
| Female parent | 60 | 1,365 | 155,670 |
| Male parent | 30 | 420 | 42,265 |
| One child | 65 | 1,115 | 125,890 |
| Two children | 25 | 495 | 54,900 |
| Three or more children | 5 | 170 | 17,145 |
| Total persons not in census families^{iv} in private households (singles) | 515 | 9,395 | 882,895 |

^{iv} A “census family” is a married or common law couple (regardless of sex) and the children of either/both spouse (if any), or a lone parent with a minimum of one child living in the same household. All members of a census family must live in the same dwelling to be considered a census family. Children are not limited by age so long as they are living in the same household and do not themselves have a spouse, common-law partner, or child in the same dwelling.³⁹

Marital Status

The chart below shows males and females who are married, living common law, single, separated, divorced or widowed as a percent of the total CSRD-A population aged 15 years and older.³

MOBILITY

This indicator measures the movement of people into and out of the community with respect to where they lived five years prior. Non-movers are those who have not moved. Non-migrants are people who have moved within the same region. Migrants include those who moved within the province (intraprovincial), those who moved to or from another province (interprovincial), and those who moved to Canada from another country (external migrants).³

| | CSRD-A (2016) | Columbia-Shuswap (2016) | British Columbia (2016) |
|---------------------------------|---------------|-------------------------|-------------------------|
| Non-movers | 70.8% | 62.4% | 57.4% |
| Movers non-migrants | 10.8% | 15.0% | 21.7% |
| Intraprovincial migrants | 5.9% | 13.2% | 11.6% |
| Interprovincial migrants | 11.5% | 7.8% | 3.9% |
| External migrants | 0.9% | 1.5% | 5.4% |

CULTURAL CHARACTERISTICS

Cultural characteristics can enhance our understanding of a community and provide important context for other indicators. Language, ethnic origin, and Aboriginal identity are a few indicators that provide insight into a region's cultural diversity.³

Ethnic Origin

Aboriginal Identity

Language Spoken Most Often at Home

| | CSRD-A (2016) | Columbia-Shuswap (2016) | British Columbia (2016) |
|-------------------------------|---------------|-------------------------|-------------------------|
| English | 95.6% | 96.5% | 79.0% |
| French | 1.9% | 0.6% | 0.4% |
| Non-official languages | 1.3% | 1.7% | 15.6% |

INFRASTRUCTURE

Infrastructure is the physical foundation for community well-being. In rural areas, types of services can vary greatly by location. These indicators offer a broad overview of what services exist within an electoral area, but not all of them are necessarily available in all parts of the electoral area.

Service Providers

| | |
|--|---|
| Electric power ^{6,7} | BC Hydro |
| Natural gas ⁷ | N/A |
| Telecommunications ⁸ | Telus, Shaw, Xplornet, Bell, Rogers, Columbia Basin Broadband Corporation, Davinci Broadband, FlexiNET, Eastlink, PEAK Internet |

*Service providers are highly dependent on location within CSRD-A. Not all service providers are available in all areas, and access may be highly limited in some.

Landfill & Waste Management

| | |
|---|---|
| Landfill location(s) ⁹ | Golden Landfill Golden Bottle Depot Parson Transfer Station |
| Regional District waste disposal rate (2017) ¹⁰ | 610 kg/person/year |
| Type of service ⁹ | Garbage and recycling |

* For comparison, average per capita waste disposal rate for BC is 506 kg/person/year (2017)¹⁰

Traffic Volumes

Traffic volume data are taken from traffic count stations within, or on routes that directly enter, the electoral area. Permanent count stations are reported when available. When permanent count stations are not available, numbers from short count stations^v are reported.¹¹

| Station location | Annual Average Daily Traffic (2018) (number of vehicles) | Monthly Average Daily Traffic January | Monthly Average Daily Traffic July |
|--|---|--|---------------------------------------|
| Route 1, 2.5 km east of route 95, Golden, (P-37-1EW) (Permanent) | 6,469 | 3,582 | 11,799 |
| Route 1, 15 km east of route 95, Golden, (P-37-5EW) (Permanent) | 6,377 | 3,550 | 11,603 |

BC Transit

CSRD-A is partially serviced by BC Transit's Columbia Valley Transit System. This system includes two connected fixed-routes: The North Connector, including Edgewater, Radium Hot Springs, and Invermere, and the South Connector which serves Invermere, Windermere, Fairmont Hot Springs, and Canal Flats. There is also a Golden/Cranbrook Health Connection which serves the valley through a partnership with the Kootenay East Regional Hospital District, RDEK, and BC Transit to provide transportation to non-emergency medical appointments. For more information on how CSRD-A is serviced by the BC transit system, visit <https://www.bctransit.com/columbia-valley/home>.

HOUSING

Housing stock, diversity, availability, and costs are an important basic foundation of functioning and affordable communities. Several indicators related to housing are included in this electoral area profile.^{3,12}

Dwellings by Structure

| | CSRD-A (2016) | Columbia-Shuswap (2016) | British Columbia (2016) |
|---|------------------|----------------------------|----------------------------|
| Total number of occupied private dwellings | 1,355 | 22,455 | 1,881,970 |
| Single-detached house | 1,075 | 15,880 | 830,660 |
| Apartment in a building that has 5 or more storeys | 0 | 20 | 177,830 |
| Other attached dwelling | 70 | 4,170 | 824,190 |
| Semi-detached house | 15 | 590 | 57,395 |
| Row house | 5 | 875 | 147,830 |
| Apartment or flat in duplex | 10 | 920 | 230,075 |
| Apartment in a building that has fewer than 5 storeys | 35 | 1,680 | 385,140 |
| Other single-attached house | 0 | 100 | 3,755 |
| Moveable dwelling | 215 | 2,390 | 49,290 |

^v Traffic volumes are monitored continuously at permanent count stations, and over a minimum of a 48-hour period every three years at short count stations.¹¹

Dwellings by Period of Construction

| | CSRD-A (2016) | Columbia-Shuswap (2016) | British Columbia (2016) |
|---|------------------|----------------------------|----------------------------|
| Total number of occupied private dwellings | 1,360 | 22,455 | 1,881,970 |
| 1960 or before | 145 | 2,700 | 267,560 |
| 1961 to 1980 | 480 | 7,980 | 559,485 |
| 1981 to 1990 | 225 | 2,810 | 289,565 |
| 1991 to 2000 | 185 | 4,405 | 331,865 |
| 2001 to 2005 | 65 | 1,345 | 125,335 |
| 2006 to 2010 | 145 | 2,060 | 171,945 |
| 2011 to 2016 | 110 | 1,145 | 136,210 |
| Private dwellings in need of major repairs | 9.9% | 7.0% | 6.3% |

Residential Property Values

| | CSRD-A (2018) | Columbia Basin-Boundary (2018) |
|--|---------------|--------------------------------|
| Number of single family dwellings | 276 | 32,152 |
| \$0 to \$99,999 | 4.0% | 4.9% |
| \$100, 000 to \$199,999 | 15.9% | 16.7% |
| \$200,000 to \$299,999 | 22.5% | 27.1% |
| \$300,000 to \$399,999 | 24.6% | 21.7% |
| \$400,000 to \$499,999 | 10.5% | 13.3% |
| \$500,000 to \$599,999 | 5.4% | 7.5% |
| \$600,000 and over | 17.0% | 8.8% |
| Median value of dwelling | 328,000 | \$304,100 |

* For comparison, the median value of dwellings for BC is \$500,874³

Household Characteristics

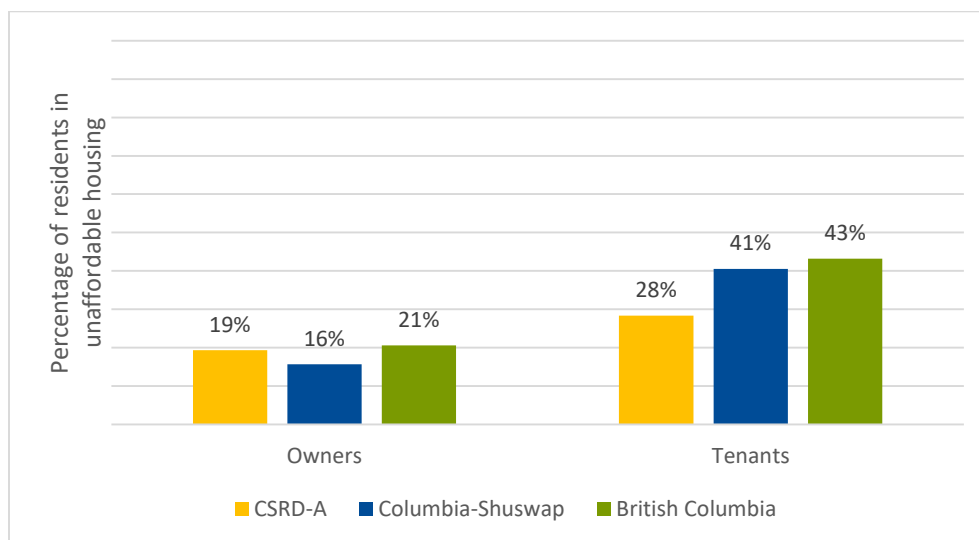

| Household Occupation (2016) | CSRD-A | Columbia-Shuswap | British Columbia |
|--|--------|------------------|------------------|
| Total private dwellings | 2,068 | 29,798 | 2,063,417 |
| Private dwellings occupied by usual residents | 65.7% | 75.4% | 91.2% |

*“Private dwelling occupied by usual residents” refers to a private dwelling in which a person or a group of persons is permanently residing.

| Private Households by Tenure (2016) | CSRD-A | Columbia-Shuswap | British Columbia |
|-------------------------------------|--------|------------------|------------------|
| Private households who are owners | 80.4% | 79.7% | 68.0% |
| Private households who are renters | 19.6% | 20.2% | 31.8% |
| Private households in band housing | 0.0% | 0.2% | 0.2% |

Housing Affordability

Housing is considered unaffordable when more than 30% of a household's income is spent on shelter costs. Shelter costs include electricity, oil, gas, wood, or other fuels, water and other municipal services, mortgage payments, property taxes, condominium fees, and rent.^{vi} In CSRD-A, 19% of owner households and 28% of tenant households spend more than 30% of their income on shelter related costs. For BC, 21% of owner households and 43% of tenant households spend more than the affordable amount on shelter.¹³

^{vi} Please see **Appendix A-2** for limitations of Statistics Canada's shelter-cost-to-income ratio calculations.

INCOME

Income is a substantial determinant of personal well-being and income levels reflect economic opportunity.

Household Income

| Before-tax household income ³ (2015) | CSRD-A | | Columbia-Shuswap | | British Columbia | |
|---|----------|---------|------------------|---------|------------------|---------|
| | Number | Percent | Number | Percent | Number | Percent |
| Under \$5,000 | 25 | 1.8% | 280 | 1.2% | 43,415 | 2.3% |
| \$5,000 to \$9,999 | 15 | 1.1% | 290 | 1.3% | 27,140 | 1.4% |
| \$10,000 to \$14,999 | 30 | 2.2% | 640 | 2.9% | 55,745 | 3.0% |
| \$15,000 to \$19,999 | 50 | 3.7% | 995 | 4.4% | 77,565 | 4.1% |
| \$20,000 to \$29,999 | 115 | 8.5% | 2,110 | 9.4% | 151,680 | 8.1% |
| \$30,000 to \$39,999 | 105 | 7.7% | 2,230 | 9.9% | 156,475 | 8.3% |
| \$40,000 to \$49,999 | 110 | 8.1% | 2,015 | 9.0% | 152,635 | 8.1% |
| \$50,000 to \$59,999 | 105 | 7.7% | 1,945 | 8.7% | 143,475 | 7.6% |
| \$60,000 to \$79,999 | 240 | 17.6% | 3,440 | 15.3% | 255,195 | 13.6% |
| \$80,000 to \$99,999 | 185 | 13.6% | 2,630 | 11.7% | 210,770 | 11.2% |
| \$100,00 to \$124,999 | 135 | 9.9% | 2,295 | 10.2% | 198,140 | 10.5% |
| \$125,000 to \$149,999 | 100 | 7.4% | 1,460 | 6.5% | 138,420 | 7.4% |
| \$150,000 and over | 135 | 9.9% | 2,120 | 9.4% | 271,290 | 14.4% |
| Median | \$68,448 | | \$64,009 | | \$69,995 | |
| Average | \$81,809 | | \$79,251 | | \$90,354 | |

Source of Income

Source of income data can provide insight into the general income structure of a population. However, the way that this information is converted from tax-filer data and assigned to regions can result in over or under-coverage in rural areas. Therefore, some caution should be used in interpreting these numbers for electoral areas. For CSRD-A, Statistics Canada reports 23.2% coverage. See **Appendix A-3** for more detail.

| Source of Income ¹⁴ (2015) | CSRD-A (% tax filers) | Columbia-Shuswap (% tax filers) | British Columbia (% tax filers) |
|---|--------------------------|------------------------------------|------------------------------------|
| Employment income | 86.8% | 74.9% | 77.4% |
| Self-employment income | 28.9% | 17.8% | 17.8% |
| Investment income | 39.5% | 41.1% | 40.2% |
| Employment insurance | 15.8% | 15.8% | 11.5% |
| Old Age Security / Net Federal Supplement | 28.9% | 44.2% | 35.9% |
| Canada Pension Plan/Quebec Pension Plan | 28.9% | 42.5% | 32.6% |
| Canada Child Tax Benefit | 15.8% | 19.4% | 22.1% |
| Workers compensation | 7.9% | 5.3% | 4.2% |
| Social assistance | 0.0% | 5.9% | 6.6% |
| Private pensions | 21.1% | 28.3% | 21.6% |
| RRSPs | 0.0% | 3.3% | 2.7% |
| Other income | 26.3% | 28.9% | 27.8% |

Low Income Measure

The after tax Low Income Measure (LIM-AT) is a commonly-used method of identifying those who are substantially worse off than average.³ It is a fixed percentage (50%) of median adjusted after-tax household income, where “adjusted” means that household needs and economies of scale are taken into account. A person is considered to be in low income when their assigned after-tax household income is below the LIM-AT threshold for their household size.^{vii} See graph below for a comparison of CSRD-A, the regional district as a whole, and BC.

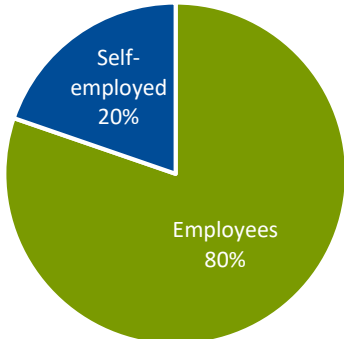

^{vii} For detailed information on how the LIM-AT threshold is calculated, see the *Low-income measure, after-tax* entry in Statistics Canada's Census Dictionary: <https://www12.statcan.gc.ca/census-recensement/2016/ref/dict/az1-eng.cfm>.

LABOUR FORCE

Class of Worker & Occupations

This indicator gives an overview of the make-up of the local workforce and industries.³ The pie charts show the percentage of the employed labour force who are self-employed versus those who are employed by others. The tables provide numbers and percentages of the labour force in specific occupations for CSRD-A, the regional district, and BC.^{viii}

| CSRD-A | | | |
|--|---|-------------------|---------|
| % Self-employed v. % Employees | Occupation | Number of persons | Percent |
|  | Sales and services | 405 | 22% |
| | Trades, transport and equipment operators and related | 400 | 22% |
| | Management | 260 | 14% |
| | Business, finance and administration | 175 | 10% |
| | Education, law and social, community and government | 130 | 7% |
| | Natural resources, agriculture and related production | 130 | 7% |
| | Natural and applied sciences | 120 | 7% |
| | Manufacturing and utilities | 75 | 4% |
| | Health | 60 | 3% |
| | Art, culture, recreation and sport | 45 | 2% |
| | | | |

^{viii} The labour force includes persons aged 15 and older, employed or unemployed.⁴⁰ Occupation is determined by the kind of work done and descriptions of the main activities in the job.³

| Management of companies and enterprises | 0.0% | 0.0% | 0.2% |

Place of Work

| Place ³ (2016) | CSRD-A | | Columbia-Shuswap | | British Columbia | |
|-------------------------------------|--------|---------|------------------|---------|------------------|---------|
| | Number | Percent | Number | Percent | Number | Percent |
| Worked at home | 185 | 11.7% | 2,280 | 9.9% | 196,510 | 8.5% |
| Worked outside Canada | 0 | 0.0% | 45 | 0.2% | 16,040 | 0.7% |
| No fixed workplace address | 320 | 20.2% | 4,010 | 17.4% | 326,180 | 14.1% |
| Worked at usual place ^{ix} | 1,080 | 68.1% | 16,780 | 72.6% | 1,766,965 | 76.6% |

^{ix} "Usual place" means working at a specific address and reporting to the same workplace location at the beginning of each shift.³

Commute to Work

| Commute Duration ³ (2016) | CSRD-A | Columbia-Shuswap | British Columbia |
|--------------------------------------|--------|------------------|------------------|
| Less than 15 minutes | 36.1% | 55.7% | 28.8% |
| 15 to 29 minutes | 40.4% | 23.6% | 32.9% |
| 30 to 44 minutes | 10.0% | 9.8% | 20.3% |
| 45 to 59 minutes | 4.3% | 3.5% | 8.8% |
| 60 minutes or more | 9.3% | 7.4% | 9.1% |

Unemployment

Unemployment rates are a strong indicator of economic health. Unemployment rates based on the 2016 Census are shown.³ [Labour Force Survey](#)^x data are available at a regional scale and is updated more frequently.

| Unemployment Rate (2016) | CSRD-A | Columbia-Shuswap | British Columbia |
|--------------------------|--------|------------------|------------------|
| Total | 13.4% | 9.0% | 6.7% |
| Male | 15.4% | 10.6% | 7.1% |
| Female | 10.9% | 7.2% | 6.3% |

Labour Force Replacement Rate

The Labour Force Replacement Rate is a measure of the number of people who will be entering vs. leaving the workforce in the next 15 years. For the purpose of this measurement, those considered to be entering the workforce are members of the population aged 0-14, and those leaving are those aged 50-64. A ratio of 1.0 means the child and retiree populations are the same. A rate of less than 1.0 means an area is unable to maintain the current labour force with local replacement workers. The rate is calculated using the Census 2016 data.³

| | CSRD-A (2016) | Columbia-Shuswap (2016) | British Columbia (2016) |
|-------------------------------|------------------|----------------------------|----------------------------|
| Labour Force Replacement Rate | 0.52 | 0.52 | 0.67 |

EDUCATION

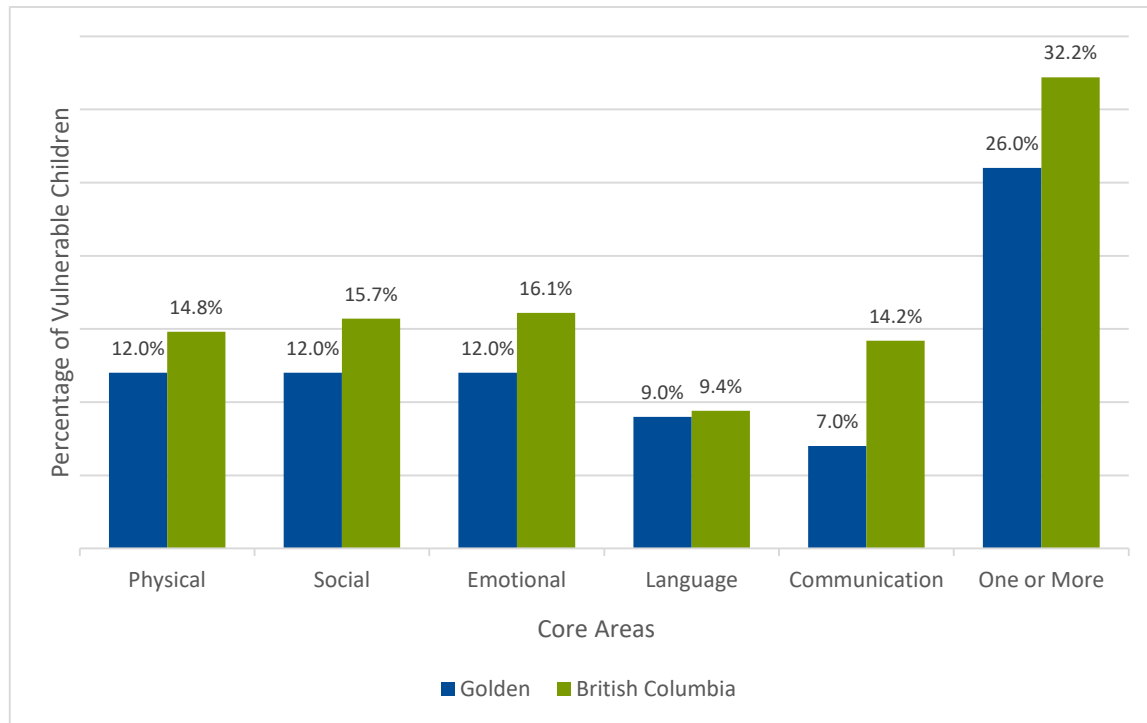

Early Development Instrument

The early years are crucial in influencing a range of health and social outcomes. Research shows that many challenges in adults, including mental health and criminality, have their roots in early childhood. The Early Development Instrument (EDI) assesses the developmental readiness of children in five core areas. These are: physical health and well-being, social competence, emotional maturity, language and cognitive development, and communication skills and general knowledge.^{xi} The EDI is used to assess the percentages of vulnerable children in each core area. Children are categorized as “vulnerable” when it is believed that they will need additional support in order to avoid future challenges in school and society. Data are available at the school district or neighbourhood level.

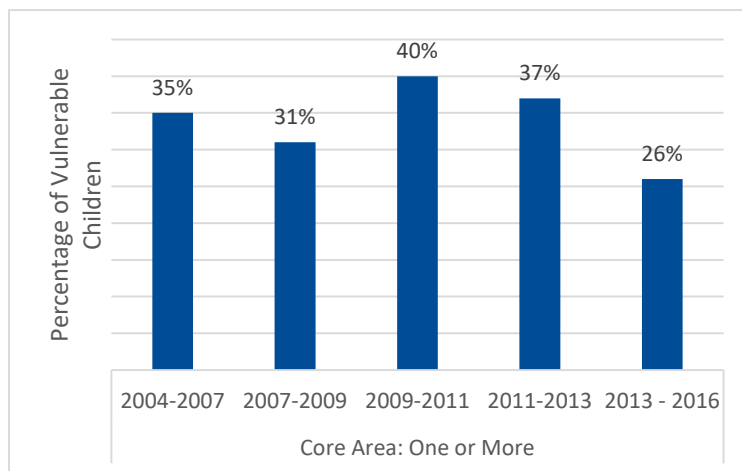

^x <http://www23.statcan.gc.ca/imdb/p2SV.pl?Function=getSurvey&SDDS=3701>

^{xi} For more information on what is measured within each core area, see **Appendix A-4**.

The chart below shows the percentage of children vulnerable in each core area, as well as the percentage of children vulnerable in one or more core areas, for the Golden neighbourhood.^{xii} Percentages for the province as a whole are shown for comparison. These data are from the most recent wave of data collection, which took place in 2013-2016.¹⁵

The chart below shows the trend over EDI collection periods for the Golden neighbourhood.

^{xii} The Golden neighbourhood covers CSRD-A and the municipality of Golden.

Public School Enrolment

CSRD-A falls within the Rocky Mountain School District (#6).^{xiii} Student enrolment¹⁶ measures the number of all adults and school-age persons who are enrolled in public schools and working towards high school graduation. Enrolment trends provide information about changes in the school-age population and is valuable for forecasting and planning.

| Rocky Mountain (SD 6) | 2014/15 | 2015/16 | 2016/17 | 2017/18 | 2018/19 |
|-------------------------------------|---------|---------|---------|---------|---------|
| Total student enrolment | 3,117 | 3,150 | 3,323 | 3,384 | 3,470 |
| Elementary student enrolment | 1,844 | 1,939 | 1,995 | 2,042 | 2,116 |
| Secondary school enrolment | 1,272 | 1,211 | 1,322 | 1,335 | 1,336 |
| Aboriginal students | 686 | 699 | 710 | 701 | 702 |
| English language learners | 39 | 50 | 57 | 70 | 34 |
| French immersion | 126 | 123 | 147 | 147 | 162 |
| Non-residents | 95 | 86 | 108 | 87 | 80 |

* Differences between total and elementary and secondary enrolments are due to a small number of graduated adults

Homeschool Counts

Homeschool counts¹⁷ are based on the number of school age homeschooled children registered with either BC public schools or BC independent schools.^{xiv} At the electoral area level, data are only available for those registered with public schools. For comparison, those registered with all BC public schools, all BC independent schools, and an overall total for the province are shown in the table below.

| | Number of registered homeschooled children | | | | | 5-year average |
|--|--|---------|---------|---------|---------|----------------|
| | 2013/14 | 2014/15 | 2015/16 | 2016/17 | 2017/18 | |
| Rocky Mountain (SD 6) | 1 | 1 | 6 | 2 | 3 | 3 |
| All Columbia Basin-Boundary public school districts | 129 | 105 | 139 | 134 | 122 | 126 |
| All BC public schools | 305 | 362 | 428 | 460 | 496 | 410 |
| All BC independent schools | 1,728 | 1,859 | 1,819 | 1,856 | 1,762 | 1,805 |
| BC Total (public and independent schools) | 2,033 | 2,221 | 2,247 | 2,316 | 2,258 | 2,215 |

^{xiii} The Rocky Mountain school district covers CSRD electoral area A, as well as RDEK electoral areas E, F and G. Numbers reported therefore reflect the populations within those electoral areas, as well as the municipalities that fall within their boundaries, and not only enrolment for CSRD-A.

^{xiv} "Independent schools" are those that are not public schools but operate in BC under an authority, offer educational programs to a minimum of 10 school age students, and meet certain other requirements as laid out in the Independent School Act.⁴¹

High School Completion

High school completion rates indicate how successful our families, schools, and communities are in supporting youth in achieving graduation. This indicator measures the proportion of students who graduate high school within six years of the first time they enroll in grade 8.¹⁸ High school graduation is generally a minimum education level for most employment and a foundation for positive workplace conditions and future employment success.

| | 2013/14 | 2014/15 | 2015/16 | 2016/17 | 2017/18 |
|------------------------------|---------|---------|---------|---------|---------|
| Rocky Mountain (SD 6) | 79.2% | 76.3% | 65.5% | 70.6% | 68.8% |
| All BC public schools | 83.7% | 83.3% | 83.2% | 83.7% | 84.6% |

Educational Attainment

Education levels are highly correlated with social determinants of health such as income, employment security, and socio-economic opportunity. This indicator measures the highest level of attainment of people aged 25 to 64 years.³

QUALITY OF LIFE & CIVIC ENGAGEMENT

Life Expectancy

Life expectancy is a widely used indicator of population health. This indicator reports on the number of years a person is expected to live based on mortality statistics for a Local Health Area (LHA).¹⁹ CSRD-A is covered by the Golden Local Health Area.

| | Life Expectancy 2012-2016 Average |
|---------------------------------|--------------------------------------|
| Golden Local Health Area | 81.8 |
| British Columbia | 82.4 |

Voter Turnout

Voter turnout is an indicator of resident involvement in politics, and can be seen as a reflection of civic mindedness and citizen engagement. This indicator measures the percentage of eligible voters who voted in local elections.

Voter turnout percentages for the 2018 election in CSRD-A are not available, as the current director was elected by acclamation.^{xv} Voter turnout for the election prior, in 2014, was 33 percent.²⁰

Crime Rates

Crime rates are a common indicator of public safety. The police reported crime rate²¹ refers to the total number of Criminal Code offences reported for every 1,000 persons, regardless of the severity of the crime (excluding traffic violations). CSRD-A falls under the jurisdiction of the Golden Provincial RCMP. The trend in crime rates from 2008 to 2017 for the Golden Provincial RCMP and the province as a whole are shown in the graph below.

Charitable Donations

Charitable donations²² play a role in improving well-being by providing support to a variety of initiatives. Charitable giving reflects a capacity to give, and is tied to the economy, in that people may give more or less depending on their financial situation and the state of the economy. Numbers below are for the regional district, as numbers are not available at the electoral area level.

| | Columbia-Shuswap (2017) | British Columbia (2017) | Canada (2017) |
|--|----------------------------|----------------------------|------------------|
| Total # of tax-filers | 41,870 | 3,614,770 | 26,807,670 |
| Total charitable donors | 7,170 | 687,620 | 5,348,220 |
| Percent charitable donors | 17.1% | 19.0% | 20.0% |
| Total charitable donations (\$'000) | \$12,155 | \$1,758,465 | \$9,576,975 |
| Median donation | \$450 | \$460 | \$300 |
| Median income | \$52,030 | \$60,800 | \$60,490 |

^{xv} A person is elected by acclamation when only one person ran for the position.⁴²

Public Library Usage

Libraries play an important role in the vibrancy of a community, as libraries are often a gathering place for residents where a diversity of programs and services are offered. Library statistics^{3,23} are useful for providing an indication of the health and capacity of these facilities in serving community needs and interests. The numbers given below are for the Golden Branch of the Okanagan Regional Library, which serves Golden and CSRD-A.²⁴ Data for this library branch are limited.

| | Golden Branch, Okanagan Regional Library (2017) | Average all libraries in Columbia Basin-Boundary (2017)* |
|---|---|--|
| Population served | 6,856 | 6,995 |
| Total active cardholders as % of population served | 31.3% | 40.6% |
| Attendance at children's and young adult programs | 1,059 | 3,320 |
| Total full-time equivalent employees (FTE) | - | 3.8 |
| Volunteer hours worked | - | 1,254 |
| Number of in-person visits | 30,623 | 40,665 |
| Total visits per capita | 4.5 | 8.4 |
| Average hours open per week | 30.40 | 38.5 |
| Total local government support | - | \$239,789 |
| Local government support per capita | - | \$35.10 |
| Total other revenue | - | \$40,102 |

*Columbia Basin-Boundary averages do not include the Golden or Revelstoke libraries, as these branches are part of the Okanagan Regional Library and comprehensive data by branch are not available.

BUSINESS

Business Counts

Trends in the number of businesses within a region is an indicator of economic health.²⁵ In the chart below, “total” refers to total number of businesses both with and without employees, and “with employees” refers only to those businesses that have employees other than the owner.

| 2008-2018 Change | |
|-----------------------|--------|
| Total | 1,472% |
| With employees | 456% |

| 2013-2018 Change | |
|-----------------------|------|
| Total | 266% |
| With employees | 309% |

| 2017-2018 Change | |
|-----------------------|-----|
| Total | -1% |
| With employees | 0% |

Business Formations

The number of businesses incorporated per year²⁶ is an indicator of the overall business climate, providing a sense of an expanding or contracting economy. Numbers are not available at the electoral area level, but have been provided at the regional district level.

| Year | Columbia-Shuswap | British Columbia |
|------|------------------|------------------|
| 2014 | 230 | 34,951 |
| 2015 | 219 | 37,934 |
| 2016 | 264 | 43,556 |
| 2017 | 289 | 46,247 |
| 2018 | 295 | 46,245 |

Visitor Centre Statistics

Visitor Centre Statistics²⁸ are a common indicator of tourism, an economic sector for many regions. Numbers for the Golden Visitor Centre^{xvi} have been provided below. Only limited data are available for this visitor centre.

| Year | Total Visitors Golden Visitor Centre | Change from previous year Golden Visitor Centre | Change for all visitor centres in BC |
|------|---|--|---|
| 2014 | - | - | 2.3% |
| 2015 | - | - | 2.9% |
| 2016 | - | - | -1.2% |
| 2017 | 10,984 | - | -0.5% |
| 2018 | 16,102 | 46.6% | -3.5% |

^{xvi}Note: The Golden Visitor Centre is only open seasonally (in the summer).

LOCAL GOVERNMENT

Local governments are required to submit data annually to the Ministry of Municipal Affairs and Housing, including annual reports and financial statements.²⁹ Regional District revenues and expenses, as well as electoral area requisitions and residential property tax rates provide an indication of a local government's capacity, financial needs and priorities, and costs to residents.

Regional District Revenues

| | Columbia-Shuswap (2017) | Percent of Total Revenue |
|---|-------------------------|--------------------------|
| Electoral area and local government requisitions | \$15,822,836 | 43.4% |
| Grants in lieu | \$2,095,663 | 5.8% |
| Sale of services | \$6,239,821 | 17.1% |
| Transfers from federal governments | \$901,254 | 2.5% |
| Transfers from provincial governments | \$4,445,614 | 12.2% |
| Transfers from regional and other governments | \$135,274 | 0.4% |
| Investment income | \$318,113 | 0.9% |
| Developer contributions | \$0 | 0.0% |
| Disposition of assets | \$0 | 0.0% |
| Other revenue | \$1,767,656 | 4.9% |
| Member municipality MFA* debt repayment | \$4,710,500 | 12.9% |
| Total revenue | \$36,436,731 | |

*"Electoral area and local government requisitions" refers to the revenue collected for the regional district from electoral areas and local governments. "MFA" stands for Municipal Finance Authority.

Regional District Expenses

| | Columbia-Shuswap (2017) | Percent of Total Expenses |
|--|-------------------------|---------------------------|
| General government | \$3,413,640 | 11.5% |
| Protective services | \$4,641,929 | 15.6% |
| Solid waste management and recycling | \$4,401,001 | 14.8% |
| Health, social services and housing | \$0 | 0.0% |
| Development services | \$2,594,647 | 8.7% |
| Transportation and transit | \$68,535 | 0.2% |
| Parks, recreation and culture | \$5,117,023 | 17.2% |
| Water services | \$1,068,853 | 3.6% |
| Sewer services | \$47,109 | 0.2% |
| Other services and adjustments | \$1,129,465 | 3.8% |
| Amortization | \$2,475,157 | 8.3% |
| Debt payments for member municipality | \$4,710,500 | 15.9% |
| Total expenses | \$29,667,859 | |

Property Taxes & Charges

Taxes on an average residential home below include local service taxes, hospital district taxes, and other agency taxes.³⁰

| Taxes on an average residential home* | CSRD-A (2019) |
|--|----------------------|
| House value | \$345,253 |
| Provincial school tax | \$701.90 |
| Provincial rural tax | \$172.63 |
| Police tax | \$44.92 |
| CSRD-A regional district | \$444.55 |
| Hospital | \$51.81 |
| BCA, MFA, and Okanagan regional library | \$53.52 |
| Total local service taxes | \$549.88 |
| Total area-wide property taxes | \$1,469.32 |

Regional requisition^{xvii} includes all property taxes and charges collected and sent to CSRD. Calculated tax rates^{xviii} below reflect all area-wide taxes, but do not include specified area taxes, which vary based on location within the electoral area.³⁰

| Total requisition & residential rate | CSRD-A (2019) |
|---|----------------------|
| Total regional requisition* (2019) | \$1,419,943 |
| Calculated residential rate/\$1,000 of assessment (2019) | \$4.2558 |

* Anticipated

^{xvii} Regional requisition refers to property tax revenue collected from the electoral area for the regional district.

^{xviii} Given the different financial reporting formats between regional districts, property tax rates may not be comparable between electoral areas that fall in different regional districts.

ENVIRONMENT

The environment is a foundation for many aspects of well-being. Parks and protected areas help to safeguard wild spaces and species, and provide opportunity for residents and visitors to recreate and connect with nature. Weather and climate conditions and trends help us understand the context in which a community operates, and climate projections can help with forecasting and adaptive planning.

Parks & Protected Areas

CSRD-A has eight provincial parks and protected areas and three national parks within, or partially within, its boundaries. It also has at least five local and regional parks and greenspaces within its boundaries. Municipal parks have been excluded from this list.

| CSRD-A | |
|--|---|
| Provincial and national parks and protected areas^{31,32} | Bugaboo Provincial Park Burgess James Gadsen Provincial Park Marl Creek Park Hamber Provincial Park Goosegrass Creek Ecological Reserve Cummins Lakes Provincial Park Cummins River Protected Area Kootenay National Park Yoho National Park Glacier National Park |
| Regional district parks, waterfront access, and green spaces³³ | Cedar Lake Recreation Site Kicking Horse Mountain Resort Park Moonraker Trails Parson Community Recreation Park Tom Kelley Memorial Park |

Weather & Climate

Weather and climate data are based on the Government of Canada's 1981-2010 Climate Normals and Averages.^{xix} The numbers presented below are from the Golden weather station.³⁴

| | January | July |
|-----------------------------|---------|------|
| Daily average (°C) | -7.9 | 17.3 |
| Daily maximum (°C) | -4.3 | 24.5 |
| Daily minimum (°C) | -11.5 | 10.0 |
| Extreme maximum (°C) | 8.3 | 40.0 |
| Extreme minimum (°C) | -46.1 | -2.2 |
| Rainfall (mm) | 6.4 | 50.6 |
| Snowfall (cm) | 45.3 | 0.0 |
| Extreme daily rainfall (mm) | 53.3 | 47.0 |
| Extreme daily snowfall (cm) | 45.7 | 0.0 |
| Extreme snow depth (cm) | 86 | 0 |

Frost-Free Dates

Frost-free dates are based on data from the Golden weather station.³⁴

| | Average Date of Last Spring Frost | Average Date of First Fall Frost | Average Length of Frost-Free Period |
|------------------|-----------------------------------|----------------------------------|-------------------------------------|
| Frost-free dates | May 15 | September 22 | 129 Days |

Modeled Climate Data – History & Projections

Climate data were modeled across the Columbia Basin-Boundary on a scale consisting of a 10x10 km grid. The figures below show median values from the results of 12 climate models for each time period and for low carbon and high carbon emission scenarios for the grid closest to Golden.³⁵ Low carbon scenarios assume global greenhouse gas emissions will be drastically reduced from current levels, while high carbon scenarios assume greenhouse gas emissions will continue increasing at current rates. For more area-specific climate data, visit the [Columbia Basin Climate Source](https://basinclimatesource.ca/) website.^{xx}

| Variable | Recent Past (1951 - 1980) | Near Future (2021 - 2050) | | Far Future (2051 - 2080) | |
|----------------------------|------------------------------|------------------------------|-------------|-----------------------------|-------------|
| | | Low Carbon | High Carbon | Low Carbon | High Carbon |
| Annual mean temperature | 4.1°C | 5.9°C | 6.3°C | 7.0°C | 8.2°C |
| Annual total precipitation | 491 mm | 519mm | 523 mm | 535 mm | 542 mm |

^{xix} The terms "climate normals" and "climate averages" are interchangeable, and refer to numbers based on observed climate values for a specific location over a specific time frame. ⁴³

^{xx} <https://basinclimatesource.ca/>

GAPS AND FURTHER RESEARCH

During the compilation of data for these community profiles, a number of gaps and opportunities for further research were identified. These are discussed below.

Sewer

While some sewer information was available, it was not possible to compile a complete/comprehensive list of sewer systems within the regional district/electoral areas. In many rural areas, the primary system consists of septic fields.

Water Services

Limited data are available on water systems in rural areas, and households often rely on their own wells. The RDI is unable to present any water system information for CSRD-A, as there are no regional district owned water systems within the area.^{xxi}

Housing Vacancy Rates

Data on housing vacancy rates in rural areas are not available.

Business Formations

Data on business formations are currently only available at the regional district or municipal level. While regional district numbers are reported in this profile, rural business formation information would be a valuable indicator if tracked in the future.

Total Building Permits

Building permits are a well-accepted indicator of economic performance. However, CSRD-A does not issue building permits at this time.

Agricultural Land

It would be valuable to include the amount of agricultural land, Agricultural Land Reserve, and/or cultivated land in rural profiles in the future.

^{xxi} There may be other groundwater systems in the area but only data from currently registered regional district systems are available.

The Columbia Basin Rural Development Institute acknowledges the support of Columbia Basin Trust

State of the Basin findings have been developed by a team of qualified researchers. A variety of data sets were used to develop indicator findings, and as such, community groupings may vary from indicator to indicator. In some cases, community-specific data are not available. State of the Basin research should not be considered to be a complete analysis, and we make no warranty as to the quality, accuracy or completeness of the data. The Columbia Basin Rural Development Institute, Selkirk College and Columbia Basin Trust will not be liable for any direct or indirect loss resulting from the use of or reliance on these data.

APPENDIX A: DATA NOTES

1. Random Rounding in Census Data

Statistics Canada uses random rounding in census data to ensure that the confidentiality of census respondents is protected. Values within census datasets (including the 2016 census profiles, which are used frequently as a data source within this report) are rounded up or down to a multiple of 5 or 10. Each individual value is rounded, and therefore the total value for the category may not add up to the sum of the individual values. Random rounding occurs each time data are pulled from the Statistics Canada website. Values in the same data set accessed at different times may therefore differ slightly.³⁶

2. Shelter-Cost-to-Income Ratio Calculation

Data gathered by Statistics Canada for the shelter-cost-to-income ratio are subject to the following limitations:

- Some households are excluded from the calculation (e.g. those living in band housing, on an agricultural operation operated by a household-member, and households with negative or zero household income)
- Differences in the reference periods for shelter cost and income data may result in relatively high shelter-cost-to-income-ratios for some households. This is because shelter cost data were gathered in 2016, while the reference period for income data is from 2015. Furthermore, reported 2015 household income may only represent income for part of the year for some households.¹³

3. Source of Income

Tax-filer data aggregated at the postal code level are used to determine source of income percentages for electoral areas. Statistics Canada converts data based on postal code boundaries to census geographies (which include electoral areas) using a “Postal Code Conversion File (PCCF).” However, because postal codes do not follow the same boundaries as census geographies, there is always some under/over-coverage that occurs during conversion. This affects data quality and is especially prevalent in rural areas.³⁷ **For CSRD-A, Statistics Canada reports 23.2% coverage.**

4. Early Development Instrument Scales

The Early Development Instrument (EDI) is based on questionnaires filled out by kindergarten teachers. The questionnaires measure five core areas that have been identified as predictors of “adult health, education and social outcomes.” See the table below for example questions from the questionnaire.³⁸ For more information on how these data are collected, visit <http://earlylearning.ubc.ca/edi/>.

| Core Area | Example Questions |
|--|--|
| Physical health and well-being | “Can the child hold a pencil, pen or crayons? Is the child on time for school each day?” |
| Language and cognitive development | “Is the child interested in reading and writing? Can the child count and recognize numbers?” |
| Social competence | “Does the child share with others? Is the child self-confident? Will he/she invite bystanders to join in a game?” |
| Emotional maturity | “Is the child able to concentrate? Is the child aggressive or angry? Is the child impulsive (does he/she act without thinking)?” |
| Communication skills and general knowledge | “Can the child tell a short story? Can the child communicate with adults and children?” |
